Travis has set a new standard for specialized rendering trailers. Throughout the past decade Travis produced hundreds of rendering trailers that were the solution to a wide variety of applications. We met our goal of maximum customer satisfaction which was ratified by a high level of repeat business. We accomplished this through excellent service, competitive pricing and a focus on quality. Our experience as a leading national manufacturer of aluminum end dumps, aluminum transfer trailers, aluminum dump bodies and steel end dumps provides the foundation for unmatched quality and innovation for our rendering trailers. Our innovative design features speak for themselves.

The Travis Rendering Trailer is available as a frame-type, a frameless, an end dump or a tipper. We install internal or external blood tanks, floor sumps, drains, center gates, clean out plates or virtually any custom specification you can dream up. Our engineers are ready to get to work to improve your operating efficiency and your bottom line. Remember, we're not just interested in your next trailer but in meeting your needs for years to follow.

**IN THE WORLD OF TRAILERS, LOOK TO THE LEADER!**

# RENDERING TRAILERS - SELECTED FEATURES & OPTIONS

## BLOOD TANKS

Frame mounted, external

Internal, non-dumping tipper

Internal, sloped nosed end dump

## CENTER GATES

From simple designs with alternative locking devices and manual controls,

to more complex, power assisted gates.

## DRAINS, VALVES and CLEAN OUTS

Name it. We can add it, weld it, hinge it, perforate it. "What goes in must come out", means top quality components, done right.

Every Travis Rendering Trailer can be built to exacting custom specifications. The following is a list of popular specifications and rigorous standards that provide the Travis with an unmatched platform for adding customer specific features.

### BODY

#### Aluminum Construction

**Sides & Gate** - .160" 5454 H34

**Floor** - .250" 5454 H34

**Nose & Doghouse** - .250" 5454 H32

**Top Rail** - 9" height with 2" inner lip

**Side Stakes** - 8" wide, robot welded, 28" centers

**Cross-members** - 5 1/2" deep, 7" flared with 7" spacing, extra heavy members in key locations
